COMPUTING AT CHARLTON

"TECHNOLOGY IS NOTHING. WHAT'S IMPORTANT IS THAT YOU HAVE A FAITH IN PEOPLE, THAT THEY'RE BASICALLY GOOD AND SMART, AND IF YOU GIVE THEM TOOLS, THEY'LL DO WONDERFUL THINGS WITH THEM."
Steve Jobs

VISION

Our vision is that every Charlton pupil is prepared for a technology driven future by fostering their interest and curiosity in using technology responsibly, creatively and safely.

INTENT

We believe that Computing education goes beyond teaching technical skills; it encompasses the development of computational thinking, problem-solving abilities, and digital literacy. Our intent is to create a learning environment that nurtures pupils' confidence in using technology, encourages collaboration, and promotes independent and critical thinking.

Our curriculum gives pupils time to produce high quality pieces of work. We ensure that the curriculum builds on the experiences of previous projects and that we utilise these skills across the curriculum.
